YOUNG BEARING — HEALTHY PRODUCTIVE BRUCE

YOUNGEST, HEAVIEST BEARERS OF ALL

Grown on our new disease-free plum root system

One of the best plums ever produced for the South, fruit attractive cherry red (large as hen eggs), rather dwarfish growing, but strong, healthy, and one of the hardiest; often bears the first year. Very frost resistant and a good shipper. We propagate all Bruce trees on disease-resistant plum understock. They produce heavily on all kinds of soil, ripen about the first of June. Very good for eating raw, jelly and canning.

PRICES ON BRUCE:

Sana - Rosa

Burbank

Methley — large blue - red.

Gold — Very productive, dark yellow.

Japanese

Late Goose — Dark red; best for jelly.

Opata — Medium blue, plum, cherry.

12 to 18 inch size	each 20¢
18 to 24 inch size	each 35¢
2 to 3 foot size	each 55¢
3 to 4 foot size	each 75¢
4 to 5 foot size	each 95¢
5 to 7 foot extra heavy	each 1.35

NOTICE — We carefully select all budwood from our own orchards — state inspected and grown on our new plum root systems. We grade all trees for uniform top and root systems.

TO COMMERCIAL GROWERS — We can furnish you very low wholesale prices on request. We have Bruce trees ranging from 6 inches to 6 feet.

LAWTON AND HUMBLE BLACKBERRIES

6,000 Acres In This Area

Leading commercial variety — large jet black berries, borne in large clusters on stout, self-supporting canes. Average production per acre (400 canner lugs or 300 pint crates) 1,250 plants per acre (rows 12 feet apart; plants 3 feet in the drill). Root cuttings are used more extensively for commercial planting. They should be spaced same as plants with 2 roots to the hill (about 3,000 cuttings to the acre).

Lawton Blackberry Root Cuttings

\$1.00 per 100; \$7.50 per thousand; 5,000 for \$35.00

GENERAL HINTS

ON PLANTING, DISTANCE,

ETC.

PEACHES — 16 to 25 feet apart each way

STANDARD APPLES — 20 to 25 ft. each way

STANDARD PEARS — 25 feet apart each way

PLUMS — 18 feet apart each way

PECANS and ENGLISH WALNUTS —

40 feet apart each way

GRAPE VINES — 8 feet apart each way

FIGS — 12 feet apart each way

STRAWBERRIES — Rows 4 ft., 18" in rows

BLACKBERRIES and DEWBERRIES —

Rows 10 feet apart, 3 feet in row

ROSES

Roses may be placed as close as 18 inches in rows $3\frac{1}{2}$ feet apart or if planted in beds they may be as close at $2\frac{1}{2}$ feet each way.

Unwrap the plants as soon as you receive them and soak the roots in water 1 or 2 hours, then rewrap them unless you can plant them at once

PLANTING — Dig holes 16 by 16 inches deep. Stand the bushes in water while you are planting. Cut off all broken or damaged roots or branches, fill the hole a little at a time, packing the dirt firmly about the roots. Use plenty of water

FERTILIZER — Soils vary. Consult your agricultural agent or fertilizer dealer on what type to use
